## Modern Desktop Enablement

# Automate the everyday & transform the future

Access Capture - industry leading, **API-driven solution** that allows enterprises to simplify and accelerate automating application management end-to-end.

Unrivaled **flexibility** allows IT teams to automate low-level, labour-intensive tasks, concentrate on work that matters, optimizing the resources at hand.

Access Capture APIs can support legacy technologies for package creation formats (**MSI**) and new modern formats such as **MSIX (VHD & CIMfs), AppVolumes** and **AppV**.

Access
IT AUTOMATION

# Who We Are

For over two decades, consistently helping clients respond to the challenges of digital transformation. With multiple automation tools and approval by the UK government for Digital Services and G-Cloud 13, we are trusted by major enterprises all over the world.

## Our Values

To create industry leading tools to enhance an organizations IT and drive us to continually solve the issues organizations faces. Reduce unneeded IT costs and manage efficiency for our clients for sustainable financial growth.

Opportunity to give back to communities through innovation and respect for individuals in and outside of Access IT Automation.

*My vision for Access IT Automation has always been to continually give businesses a cheaper, easier way to enable modern desktop through best-in-class tools.*

Tony Head

Access IT Automation, CEO

# Our History

With over 25 years of knowledge in End User Computing and over 1M desktop and application migrations under our belt.

We emerged from a managed services organisation into automation product company, to provide first class service harnessing people and automation to ensure our client are as efficient and cost effective as possible

## 1996

### Continued Growth
Access continues to grow, becoming a G-Cloud (UK Government Procurement Framework) 13 member and MSFT Gold Partner.

## 1997
### First Enterprise
Major US Bank signs a 4-year deal with Access Computer Consulting

## 2007
### First Tools
Access create first custom software applications to accelerate client's success.

## 2015
### Automation
Based on client success Access creates strategic team to invest in automation.

## 2017
### Products
Officially launched both Access Capture and Access Symphony.

## 2022
### Further Dev
API driven development technology producing industry leading results.

# Our Unique View

# Products

## Automation first approach to enable modern workspace

Access IT Automation's tools create the environment to give your client's 360-degree insights, maximize agility, and provide actionable insights for all applications, users, and platforms.

### access CAPTURE

Automated application packaging and testing to provide your organization with a functional, secure modern desktop.

### access SYMPHONY

An endpoint automation service offering a wealth of data metrics giving you detailed insight into your entire IT estate.

access IT AUTOMATION

# Access Capture
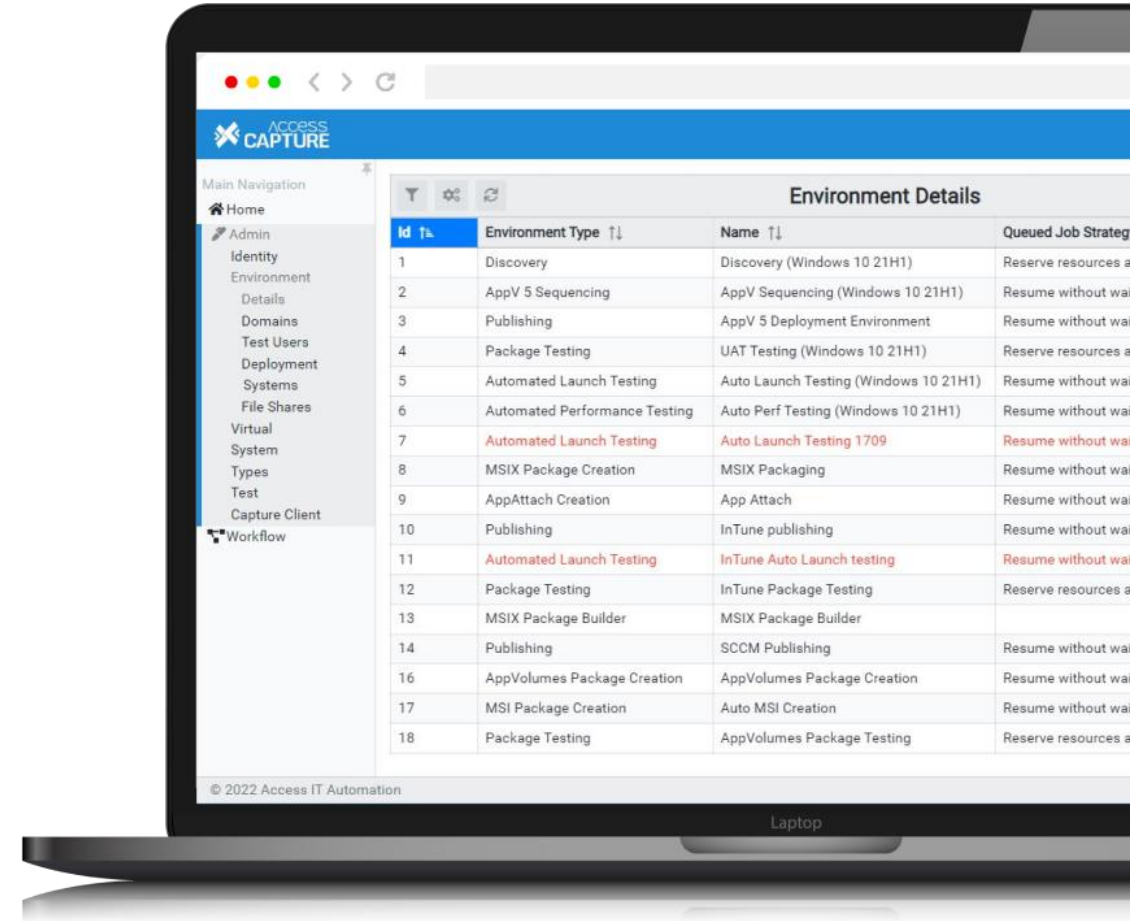

# Application management

End to end Application Management is integral to the smooth operation of end user computing and desktop management – without apps what is a Desktop PC?.  Access Capture features are modular and API first by design.

# Discovery

## Whom are we helping

IT Managers

Product Owners

## How do we help

Capture AppScan allows you to check the suitability of your apps landscape, to assist your modern packaging format decision.

Access Capture's Discovery module allows application product owners feel part of the application management process.

## TECH DETAILS

Key technical identifiers are checked against each application **suitability for MSIX, AppV** and other modern formats.

AppScan's automation features indicate **which applications have potential blockers.**

Virtual Machine provisioned to enable easy application install and changes to be applied.

Each step of the application installation routine is generating **robust quality** output in **PDF and MSI formats.**

# Packaging

## Whom are we helping

IT Managers

Application Packagers

Core Build Engineers

Application Developers

## How do we help

Focus your skilled IT Engineers on more complex projects

**Centralised automation** of modern package format output

Enabling you to Proof of Concept **new technologies** faster

**CI/CD Pipelines** for more efficient use of package creation
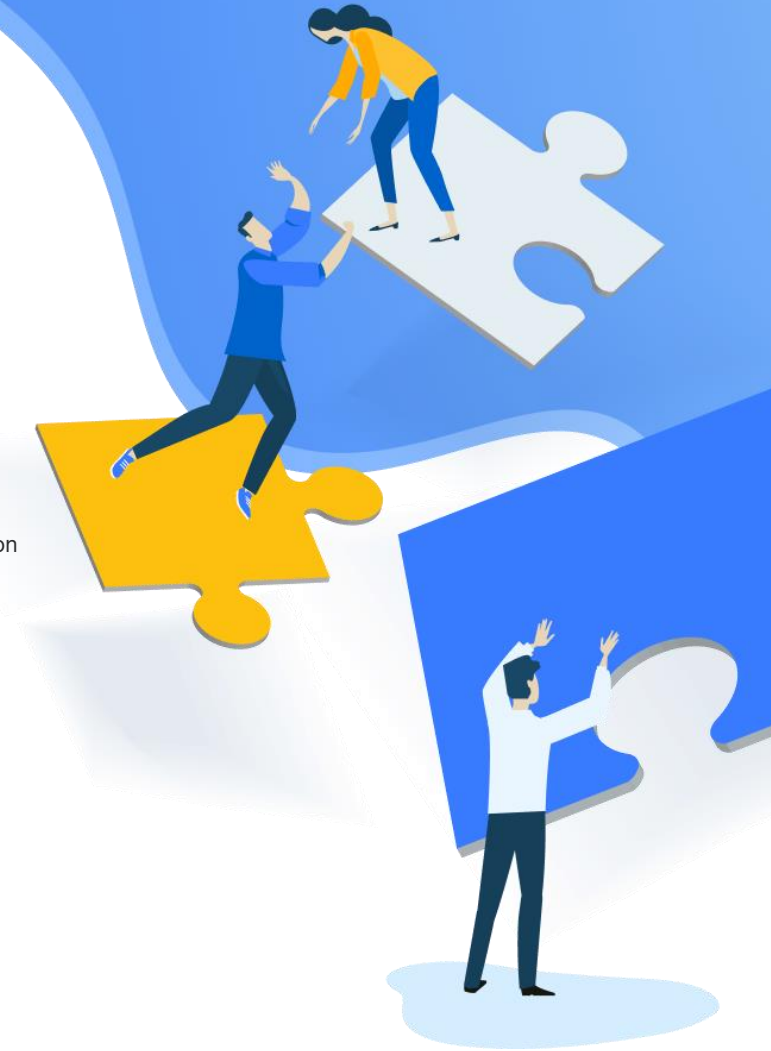

## TECH DETAILS

Not matter what package type you require we've got you covered:

- EXE to **MSI Creation**
- EXE to Microsoft AppV Creation
- MSI to Microsoft **AppV Conversion**
- Microsoft AppV to Microsoft MSIX Conversion
- Microsoft **MSIX Creation**
- Microsoft MSIX + app attach (VHD) Creation
- Microsoft MSIX + CIMfs Creation
- VMWare AppVolumes VMDK & VHD + DEM Creation
- Numecent CloudPaging Creation

Capture Packaging

# UAT

## Whom are we helping

IT Managers

Product Owners

Packaging/QA Engineers

UAT Testers (end users)

Core Build Engineers

## How do we help

**Performance** detail per application on any Windows O/S.

Centralising and providing UAT testers with **managed machines**.

Proof that applications work **from one build to another**.

**Video** creation of all applications tested for any Microsoft change.

## TECH DETAILS

Due to Microsoft **regular release cadence** of operating systems, patches, security and feature updates, Testing is now paramount to Windows as a Service, Evergreen IT and Modern Desktop, Access Capture Testing covers :

- Launch (**Smoke**) Testing (Autonomous)
- Interactive **QA** Testing (Functional) + Performance
- Interactive **UAT** Testing (Functional) + Performance
- **Performance** Testing (Autonomous)

## MODULES

Capture Testing

# Publish

## Whom are we helping

IT Managers

Product Owners/Requestors

Deployment Engineers

End Users

## How do we help

Ensure all application objects are centrally created autonomously

Ability to be integrated to a change management workflow

Enabling deployment engineers to work on more complicated tasks and projects

Automation of the application object creation and management of users apps groups*

*Active Directory Security Groups

## TECH DETAILS

Access Capture Publishing job types support a variety of industry standard deployment systems.

- SCCM Configuration Manager (MSI, AppV, MSIX)
- InTune **Endpoint Manager** (MSI, MSIX, Win32)
- AppV Management Console (AppV)
- **AppVolumes Manager** (AppVolumes VMDK)
